INNOVATING AN INDUSTRY™

FEATURES AND SPECS

All Manual Hydraulic Controls

All hydraulics are controlled manually on the bucket.

No Electronics

No need to route wires for a control panel in order to operate the salter. This bucket is designed to make setup and operation simple and easy.

Independent Controlled Auger

Control the auger's speed, independently from the spinners, to determine the density of your salt application.

Dual Hydraulic Spinners

Easily control the speed of the spinners to adjust the salt spreading range up to 30 feet on both sides.

Scoop N' Spread Design

No need for another piece of equipment to load the DoubleDown Salt Bucket™. Just tilt, scoop and spread.

Slip-Hitch™ Universal Coupler System

Uses the same patented Slip-Hitch™ Universal Coupler System found on all Arctic attachments, allowing the operator to stay in the cab, while easily switching back and forth between plowing and salting attachments.

SIZES	LENGTH	WIDTH	HEIGHT	WEIGHT
1 cu. yd.	42.8"	82.3"	42.3"	1,402 lbs
3 cu. yd.	77.4"	100.7"	64.9"	2,762 lbs
