A snowplow is shown from a low angle, clearing a road of snow. The plow is yellow and has the Arctic Sectional Sno-Plow logo on its side. A driver in a high-visibility vest is visible in the cab. The background shows a clear blue sky and some trees.

SECTIONAL SNO-PLOW™

ATTACKING SNOW FROM A WHOLE NEW ANGLE

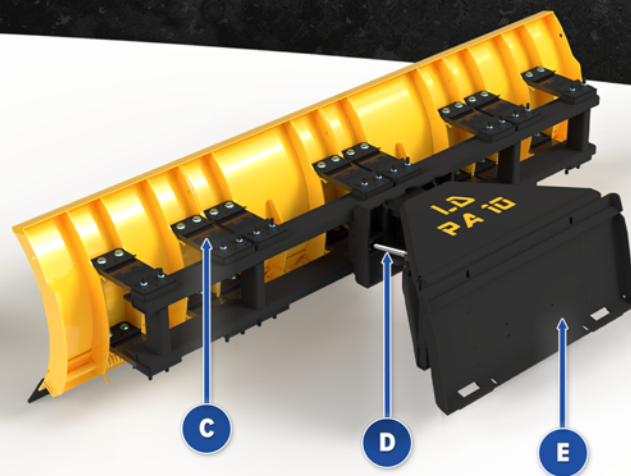

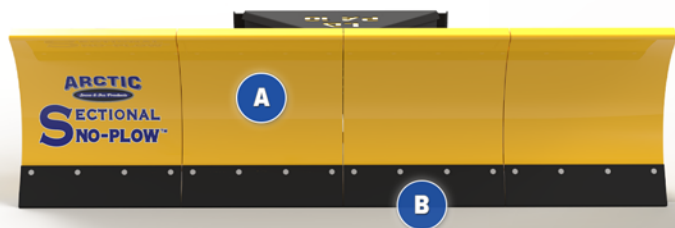

The Arctic Sectional Sno-Plow™ is a game-changer in the field of snow removal. Its design, durability, and functionality combine to create a powerhouse solution for efficiently clearing snow-covered roads and surfaces. As communities face the challenges of winter, Arctic Snow and Ice Products continue to lead the way with innovative solutions that redefine the standards of snow removal equipment. The Sectional Sno-Plow™ stands as a testament to the company's commitment to excellence, safety, and environmental responsibility in the realm of snow and ice management.

INNOVATING AN INDUSTRY™

A Arctic Sectional Technology

Comprised of 32 inch independent sections on the HD models and 30 inch on the LD models, to let the plow contour to the grade of any surface for cleaner passes. Each moldboard section independently trips over unseen obstacles beneath the snow.

B Redesigned AR500 Steel Spring-loaded Cutting Edges

AR500 carbon-harden steel cutting edges scrape compacted snow and ice down to the pavement, eliminating follow-up plowing. The spring-loaded design allows the cutting edge to trip back on pavement anomalies up to 6" to 8" depending on cutting edge height.

C Polyurethane Mounting Blocks

Durable, specially-engineered polyurethane mounting blocks secure each moldboard section to the plow's mainframe, absorbing impact to protect the plow, carrier and operator. The "polyblocks" also allow each section of moldboard to independently move up and down over obstacles.

D Hydraulic Powered

Rotates up to 30° on both sides. All models come with standard hose kits and flow limiters installed.

E Slip-Hitch Universal Coupler System

Allows for quick and easy changeover to any quick connect couplers or bucket mounts to fit any equipment manufacturer's mounting system. It floats up and down independently from the machine and automatically self-levels the pusher. It also allows the machine to keep all four tires on the ground for full traction.

SECTIONAL NO-PLOW™

■ LIGHT-DUTY MODELS | 30" WIDE MOLDBOARDS

MODELS	WIDTH	HEIGHT	WEIGHT
PA LD 8	91"	32"	1,200 lbs
PA LD 10.5	121"	32"	1,600 lbs
PA LD 13	151"	32"	2,000 lbs
PA LD 15.5	181"	32"	2,400 lbs

■ HEAVY-DUTY MODELS | 32" WIDE MOLDBOARDS

MODELS	WIDTH	HEIGHT	WEIGHT
PA HD 11.5	129"	50"	3,950 lbs
PA HD 14	161"	50"	4,400 lbs
PA HD 17	193"	50"	4,850 lbs

Pricing does not include skid steer mount, bucket mount or OEM style coupler hook mount. Pricing available upon request only due to numerous OEM style coupler hooks available.

All Power Angle plows come standard with hose kits and flow limiters installed. Light-Duty Plows have 7' hoses and 4 gallons per minute flow limiters installed. Heavy-Duty Plows have 3' hoses and 8 gallons per minute flow limiters installed.
